REMARKS

The figures of births and deaths shown in this statement for week ending the 5th February, 1955, relate to 196 towns with an estimated population of 26,718 thousands. The total number of towns is 300 and their population is 38,987 thousands. Thus 65% of the total number of towns representing 69% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 15,469 and 6,698 representing birth and death rates of 30.1 and 13.0 per thousand of population, respectively.

(a) *States (Part A & Part C).*—The data here relate to 170 towns with an estimated population of 23,300 thousands. Information about Ajmer, Assam, Bihar, Bhopal and West Bengal could not be included. The total number of towns is 252 and their population is 32,571 thousands. Thus 67% of the total number of towns representing 72% of the total population is covered. The number of births and deaths

recorded in these towns were 13,831 and 5,923 representing birth rates and death rates of 30.9 and 13.2 per thousand of population, respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 26 towns with an estimated population of 3,418 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 54% of the total number of towns representing 53% of the total population is covered. The number of births and deaths recorded in these towns were 1,638 and 775 representing birth and death rates of 24.9 and 11.8 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
